

Assessment services

VIRTUAL CISO

Get independent support and advice to enhance your organisation's cyber security

Strategic security advice as and when you need it

In the face of a global talent shortage, it isn't easy to identify and hire a security professional with the knowledge and leadership required to develop an information security strategy.

Redscan's **Virtual Chief Information Security Officer (vCISO)** service addresses this challenge by enabling your organisation to call upon a highly qualified and experienced security professional as and when required.

Acting as an extension of your team, a Redscan vCISO will help to assess potential cyber risks as well as develop and implement the policies and controls needed to elevate your security posture and achieve compliance standards.

// Nearly half of UK businesses have a basic cyber security skills gap."

DCMS SKILLS REPORT 2020

WHEN A VCISO COULD HELP

- Planning security audits, assessments and reviews
- Developing an information security strategy
- Achieving compliance with the latest security standards
- Procuring new security products and services
- Recruiting and training security personnel
- Responding to and remediating incidents
- Creating and instilling a cyber-aware culture

Business benefits

Receive independent advice

Obtain the impartial advice and guidance you need to develop your organisation's cyber security strategy.

Validate security effectiveness

Receive help to measure and improve the effectiveness of security controls and processes.

Achieve compliance

Better understand the latest security requirements, how they apply to your business and how to satisfy them.

Enhance risk awareness

Help stakeholders across your organisation to better understand the importance of security and how risks are evolving.

Reduce overheads

Save money by only engaging a senior security expert to provide assistance as and when required.

Prioritise future investments

Gain deeper insight into your security weaknesses to ensure that future investments deliver the greatest return.

Why use Redscan's CISO service?

By commissioning a Virtual CISO from Redscan, you receive independent support and advice from an expert familiar with the challenges of managing information security across a wide range of industries.

A Redscan vCISO is available to provide regular consultancy, assist with projects and offer guidance during critical periods such as preparing for a business merger.

56% of security leaders believe cyber security staff shortages are putting their organisation at risk."
